# **Portable Micro Power Supply**

## Overview

---

What is a small portable power station?

Small portable power stations offer a practical solution, providing the necessary power without the bulk. You might be wondering which models stand out in terms of performance and versatility. From the VTOMAN FlashSpeed 1000 to the Anker SOLIX F2000, there's a range of options tailored to your needs.

Is the Raspberry Pi micro USB power supply compliant?

The Raspberry Pi Micro USB Power Supply has undergone extensive compliance testing and meets a number of regional and international standards. View and download relevant certificates and conformity documents. If you require any further information regarding compliance, please contact us at [compliance@raspberrypi.com](mailto:compliance@raspberrypi.com).

What power supply do I need for my Raspberry Pi?

The official and recommended micro USB power supply for all micro USB-powered Raspberry Pi computers 5.1V / 2.5A DC output 96-264Vac operating input range Short circuit and overcurrent protection 1.5m 18AWG captive cable with micro USB output connector Available in different variants to suit different international power sockets.

Should you buy a small portable power station?

Regularly check battery levels, avoid deep discharges, and follow the manufacturer's guidelines for optimal care. In conclusion, investing in a small portable power station is a smart move for anyone on the go. With options like the VTOMAN FlashSpeed 1000 and Anker SOLIX F2000, you can find the perfect fit for your charging needs.

What is a P1 portable phantom power supply?

The P1 Portable Phantom Power Supply gives you 48V or 12V of reliable power

for condenser microphones, on the go! This small but rugged unit is an essential utility product for engineers and musicians who use condenser mics or any other gear that requires phantom power, such as active DI boxes or mic preamps.

What can a portable power station charge?

All portable power stations can charge up small gadgets like phones and laptops or be used to power lighting. Most can handle small appliances like mini-fridges or TVs. If you want to use power tools, an AC unit, or in the UK, a kettle, you need to be able to draw thousands of watts.
