Portable power source factory in Albania

Overview

Does Albania have a hydro power plant?

Albania's domestic generation is almost entirely dependent on hydropower since the country's only thermal power plant is currently inoperable. The total installed generation capacity has increased over the last few years because of new private investments in hydro power plants and more recently in small solar farms.

Does Albania have a power supply security problem?

Albania is a net importer of electricity; power supply security is a challenge. Albania's domestic generation is almost entirely dependent on hydropower since the country's only thermal power plant is currently inoperable.

Is Excelerate a good power project for Albania?

"It's a good power project for Albania," Excelerate Chief Executive Officer Steven Kobos said about the floating plants deal. "Obviously we hope it will lead to the opportunity to deliver natural gas and sell natural gas into Europe from that access."
