# Power generation container house manufacturer quotation

## Overview

---

What are containerized generator / packaged container and enclosure options?

Containerized generator / Packaged container and enclosure options provide alternatives to installations in existing or new buildings. We have significant experience with pre-packaged container and enclosure solutions for engine-generator sets, balance of plant equipment, and switchgear.

Why should you choose genset containers?

With our genset containers offer optimal performance in various site conditions. By maintaining high-quality standards for both the engine and the complete containerized power plant package, we ensure excellent reliability for your power and heat generation needs. Easy to install and disassemble, convenient for maintenance and inspection.

Why do you need a pre-packaged generator?

Pre-packaged containers and enclosures can simplify and expedite installation time, provide sound attenuation and personnel protection inside buildings, and provide weather protection for outside installations. Unified Power offers containerized generator sets with CHP and Emission control system.

What is unified power genset?

Unified Power offers containerized generator sets with CHP and Emission control system. Leveraging the expertise acquired during several years of manufacturing CHP/ CCHP Modular containerized gas power solutions. With our genset containers offer optimal performance in various site conditions.

What is a twin power container?

The Twin Power container solution is a container that combines two engine/alternator assemblies with/ without CHP in a 40ft container, making it perfect for applications that require variable or continuous power. Because

you have two generators on a single platform, you have the flexibility you need to meet a 100% load or even a smaller load.

What is E-house (prefabricated electrical room) container?

E-House (prefabricated electrical room) Container is a prefabricated walk-in modular steel structure outdoor box that can accommodate medium voltage (MV) and low voltage (LV) switchgear and auxiliary equipment. It is often called PowerHouse or Power Distribution Center.
