What is an uninterruptible power supply (UPS) system?

Courtesy: Affiliated Engineers Inc. Uninterruptible power supply (UPS) systems have been a familiar presence for years, known for their ability to enhance power quality and offer continuous power for critical loads. These systems typically supply power for a few minutes while the generator starts up.

What is the difference between Bess and ups?

UPS is focused on providing immediate, short-term power backup during interruptions, ensuring continuous operation of critical systems for a limited duration. BESS is designed for long-term energy storage and management, supporting renewable energy integration and providing power over extended periods.
