Overview

How much does a photovoltaic panel cost?

Mainstream Photovoltaic Panels: Average price of €0.10/Wp, down 9.1% month-on-month. Low-Cost Photovoltaic Modules: Average price of €0.060/Wp, a decrease of 7.7% compared to the previous month. These figures underscore the significant pressures in the photovoltaic market, as price reductions strain margins to unprecedented levels.

How much did solar panels cost in October 2024?

Here's a detailed breakdown: High-Efficiency Solar Panels: The average price was €0.125/Wp, marking a 3.8% decrease compared to October 2024. Mainstream Solar Panels: Prices averaged €0.095/Wp, experiencing a 5% decline from October 2024. Low-Cost Solar Panels: Prices remained stable at €0.060/Wp, unchanged from the previous month.

How much does a photovoltaic module cost?

Mainstream Modules: Average price of €0.11/Wp, stable compared to September but 21.4% lower than January 2024. Low-Cost Modules: Average price of €0.065/Wp, a 7.1% decrease from September and 27.8% from January 2024. These trends are exerting mounting pressure on the photovoltaic sector.

How efficient are photovoltaic modules in 2025?

But let's take a closer look at the figures recorded in January 2025: Photovoltaic modules with monocrystalline or bifacial HJT cells, N-type/TOPCon or xBC (Back Contact) and their combinations, with efficiencies above 22.5%.

Will solar module prices change in 2025?

As of January 2025, solar module prices have remained relatively stable across all categories, including ultra-high-efficiency products and other module classes. While there have been minor price increases in the two lower

categories—partially due to the updated classification—the overall market has yet to see significant price changes.

Why are photovoltaic modules falling in 2024?

Prices for photovoltaic modules in 2024 continue to fall. According to the monthly index published by Germany's pvXchange Trading, the downward trend persists, driven largely—if not entirely—by Asian overproduction. The index focuses on the European market, which pvXchange has been monitoring since 2009 with a unique pricing tool.
