Prices of home energy storage systems in Georgia

Overview

As of June 2025, the average storage system cost in Georgia is \$1580/kWh. How much does a solar system cost in Georgia?

In Georgia, a typical residential solar system costs \$9,555 to \$27,300, depending on the size of your system and what financial incentives you qualify for. On average, it takes solar panels approximately 10 years to pay for themselves in Georgia. Over 25 years, Georgia homeowners with solar panels avoid \$57,429 in total utility costs on average.

Do solar panels pay for themselves in Georgia?

Once you know your current energy consumption, you can calculate your potential savings and the time it should take for your solar installation to pay for itself. In Georgia, solar panels usually pay for themselves within 10 years.

3. Georgia solar incentives: federal and state.

How long do solar panels last in Georgia?

It takes years for electric bill savings to make up for the initial cost — about 10 years on average in Georgia. If you sell your house and move before then, you might not fully realize the financial benefits of your solar investment. Solar panels last 25 to 30 years.

Are solar panels a good investment in Georgia?

The main drawback is the high upfront cost of purchasing and installing the equipment. On the bright side, once that's paid for, solar panels can significantly reduce or even eliminate your electricity bills. For many Georgians, the long-term savings outweigh the upfront costs over time.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most

valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

How do I get solar energy in Georgia?

You may be able to take advantage of additional solar incentives in Georgia. For instance, Central Georgia Electric Membership Corporation has a loan program for up to \$25,000, and a new program, Georgia Bright, aims to help low-income homeowners install solar on their roofs. 4.
