Overview

Why is Rabat a green city?

The City of Rabat administration is resolutely committed to supporting the implementation and localization of Global Agendas linked to Sustainable Development, in particular SDG11. The Imperial city of Rabat was classified as a Green city by the Earth Day Network in 2010, and as World Heritage city by UNESCO in 2012.

What is a green base station solution?

The green base station solution involves base station system architecture, base station form, power saving technologies, and application of green technologies. Using SDR-based architecture and distributed base stations is a different approach to traditional multiband multimode network construction.

What is the city of Rabat doing to promote digital inclusion?

The City of Rabat is committed to expanding their efforts to provide citizens with better access and improved government services. Using a participatory model that focusses on digital inclusion, the project aims to increase skills, to enhance quality of life, to drive education and promote economic wellbeing across the municipality.

Where is Rabat located?

Rabat is the capital and seventh largest city in Morocco, it also serves as the capital of the Rabat-Salé- Kénitra administrative region. The city is located on the Atlantic coast at the mouth of the Wadi Bou Regreg river, opposite the city of Salé in the country's north-west.

Are green cellular base stations sustainable?

This study presents an overview of sustainable and green cellular base stations (BSs), which account for most of the energy consumed in cellular networks. We review the architecture of the BS and the power consumption

model, and then summarize the trends in green cellular network research over the past decade.

What is Rabat's smart city axis?

As defined in its Rabat's municipal action plan a, the smart city axis is part of this large program. The city plans to create resilient systems, more efficient and decentralized institutions, and will future-proof investment decisions.
