# **Romania Photovoltaic Energy Storage**

## Overview

---

In a milestone for Romania's green energy push, the country's Energy Minister Sebastian Burduja has signed the nation's first financing contracts under the National Recovery and Resilience Plan (PNRR), dedicated to supporting domestic production of photovoltaic panels and expanding battery storage capacity. How does Romania support the production of solar / PV energy?

The Romanian State supports the production of solar / PV energy by offering six (6) green certificates for each MWh produced and injected into the grid.

Will NRRP support the production of photovoltaic panels in Romania?

"For the first time ever, we have signed the first agreements under the NRRP to support the production of photovoltaic panels in Romania and for battery storage capacity," Sebastian Burduja noted.

Does Romania have a solar PV market?

Our sister site PV Tech has covered Romania's solar PV market extensively. The Ministry also announced a €199 million call to support Romania's battery and solar photovoltaic (PV) manufacturing sectors, also funded through the NRRP, with €149.25 million for new battery production, assembly and recycling facilities.

How much money is needed for energy storage projects in Romania?

The projects must focus on building new energy storage capacities in Romania," the minister stated. According to the minister, as quoted by ZF.ro, the total budget for this state aid scheme is €150 million in non-reimbursable funds sourced from the Modernization Fund.

How much money will be invested in Romania's energy sector?

Today, the Minister of Energy, Sebastian Burduja, announced on Facebook that an additional €150 million will be invested in Romania's energy sector. "I am pleased to announce that the Ministry of Energy is launching a new call for

projects financed through the Modernization Fund, aimed at investments in energy storage capacities (batteries).

How much money will Romania spend on solar projects?

Meanwhile, the remaining €49.75 million is intended for new projects in Romania that would add solar PV cell and module (panel) production, assembly and recycling capacity to the tune of at least 200MW per year by mid-2026.
