

Serbia container energy storage factory

Overview

What is storeenergy?

Welcome to StorEnergy, where we're reshaping the future of energy storage. Our groundbreaking thermal energy storage solution, powered by recycled ceramics, embodies our commitment to innovation, sustainability, and cost-efficiency. StorEnergy is the answer to reliable and eco-friendly energy storage.

How has CIEMAT transformed energy storage & delivery?

We've initiated several groundbreaking projects both domestically and internationally. Our most notable undertaking is the 3 MWh thermal storage capacity system at the CIEMAT institute in Spain. This has served as a valuable test bed for our technology, reinforcing our belief in its potential to transform energy storage and delivery.

How does ceramic storage work?

The ceramic material is heated up to 900 degrees Celsius, after which the stored heat can be dispatched on demand. This unique approach ensures a longer lifespan, lower maintenance costs, and significant improvements in the capacity to store energy per unit of volume, giving us an edge over traditional storage systems.
