Snow clearing machine emergency communication command base station

Overview

What is a two-way emergency communication system?

The Command Center Two-Way Emergency Communication System is designed to provide efficient two-way, person-to-person voice communication for Area of Refuge, accommodating an impressive range of 1 to 116 Call Boxes. Utilizing a home run configuration with only one pair of wires needed between each Call Box and the head end.

Are call boxes a code-compliant emergency communication system?

Each Area of Refuge requires hands-free, two-way emergency communication devices (Call Boxes) on each floor above/below the main exit floor. A code-compliant two-way communication system for rescue assistance requires a central control point to manage emergency assistance calls from call boxes.

What is the IP command center two-way communication system?

The IP Command Center Two-Way Communication System is more than just a communication tool; it's a comprehensive solution that integrates with your existing network. Designed to handle between 1-128 call boxes, it leverages Voice Over Internet Protocol (VOIP) to provide seamless two-way communication.
