

## SolarInnovate Energy Solutions

# Solar air conditioning in Paraguay

Nominal Capacity

**280Ah**

Nominal Energy

**50kW/100kWh**

IP Grade

**IP54**

## Overview

---

What is the Atlas of the solar and wind energy potential of Paraguay?

The Atlas of the solar and wind energy potential of Paraguay is one of the tools developed by Itaipu to make visible data of great relevance for developers of these technologies interested in new generation projects in this country. That document reflects a promising future for solar technology.

Why is Paraguay a renewable country?

Paraguay has one of the highest proportions of renewable energy in South America. Hydropower constitutes around 99.5% of the installed electricity capacity. This makes it highly dependent on the rivers that feed the country's main hydroelectric plants, from where most of the electricity produced is exported to neighboring countries.

Why is Paraguay an inefficient exporter?

Paraguay holds the rare title of the world's largest exporter of electrical energy, but many argue that it is an inefficient exporter because the compensation it obtains is much lower than the market price of energy; at the same time as an inefficient consumer because it uses a very low amount of its installed hydroelectric capacity.

Why should you choose Chaco solar?

At Chaco Solar, we harness the abundant sun in Chaco and provide energy exactly when it's needed most – during the intense midday heat. Our solar panels and battery storage offer reliable and sustainable energy solutions specifically designed to make the most of our region's natural resources.
