

**SolarInnovate Energy Solutions**

# **Solar tile source manufacturer**

## Overview

---

What is solar tile?

Solar tile, which combines solar panels and roof tiles, integrates photovoltaic and architecture. Crystal silicon photovoltaic technology and building tile structure are innovated to eliminate the complex project of secondary installation and replace traditional cement tiles and clay tiles with one-time paving.

Who is Tmax solar roof tile?

T MAX solar roof tile are rooted in Gainsolar Yingli's 323 BIPV patented technologies. We have participated in the compilation of 17 industry standards for BIPV, and are the top player in crystalline silicon BIPV production capacity and market share. We are one of the most innovative and leading companies in BIPV industry.

What are solar shingles & solar tiles?

Solar shingles combine roofing materials and solar modules into one durable building material. This way, the roof can have a beautiful, fully integrated edge-to-edge appearance while still acting as an energy-generating unit. Solar tiles work on the same principle as traditional solar panels.

Are solar tiles a good investment?

Solar tiles perfectly combine architecture, aesthetics and photovoltaic technology, making the entire roof look beautiful and elegant, with a strong sense of technology, and enhancing the value of the property itself.

What are the main products of a solar company?

The company engages in solar solutions and system integration. It's series of solutions rely on the intelligent production line of photovoltaic products. The main products include: BIPV modules, PERC/TOPCON/HJT solar modules, LiFePO4 batteries. The team of the company has rich knowledge and

implementation experiences in photovoltaic applications.

What are Photovoltaic tiles?

The tiles adopt the traditional form of ceramic tiles, using dark gray single glass three curved photovoltaic tiles (Hanwa) as the main material for photovoltaic power generation, with a total installed capacity of about 317.6 kilowatts.
