Ten thousand base stations in the communications industry by 2025

Overview

How many 5G base stations will China have by 2025?

China's Ministry of Industry and Information Technology (MIIT) plans to more than triple the number of 5G base stations over the next four years, targeting a total of 3.64 million by end-2025, local newspaper China Daily reported. China aims to have about 3.64 million 5G base stations by the end of 2025.

What is the future of base station technology?

The industry is seeing innovations in both small cell and macro cell technologies, with vendors focusing on developing more efficient, compact, and powerful base station solutions that can support various deployment scenarios from dense urban areas to rural locations.

What is the fastest growing segment in 5G base station market?

The 5G macro cell segment is emerging as the fastest-growing segment in the 5G base station market, projected to grow at approximately 40% during the forecast period 2024-2029.

How big will the information and communication industry be in 2025?

The five-year plan also forecast that by the end of 2025, the information and communication industry will maintain an annual growth rate of about 10 percent to reach a total revenue of 4.3 trillion yuan (\$674.2 billion) in 2025.

Which segment dominates the 5G base station market in 2024?

The industrial segment maintains its dominance in the global 5G base station market, commanding approximately 27% market share in 2024. This significant market position is driven by the accelerating adoption of Industry 4.0 initiatives and the growing integration of IoT devices in manufacturing facilities.

How big is the 5G base station market?

The 5G Base Station Market is expected to reach USD 37.44 billion in 2025 and grow at a CAGR of 28.67% to reach USD 132.06 billion by 2030. Huawei Technologies Co., Ltd., ZTE Corporation, Nokia Corporation, CommScope Holding Company, Inc. and QUALCOMM Incorporated are the major companies operating in this market.

Ten thousand base stations in the communications industry by 2025

China Aims to Build 600,000 5G Base Stations in 2023

Mar 7, 2023 · China built 887,000 5G base stations last year, accounting for more than 60% of the world's total, according to a statistical bulletin of the communications industry in 2022 issued

...

China's Ambitious 5G Base Station Plan for 2025: A Leap

...

Dec 30, 2024 · China is set to establish over 4.5 million new 5G base stations by 2025, enhancing connectivity and transforming various industries. This ambitious expansion aims to bridge the
