

SolarInnovate Energy Solutions

Tool battery and click charging

LiFePO₄

Wide temp: -20°C to 55°C

Easy to expand

Floor mount&wall mount

Intelligent BMS

Cycle Life:≥6000

Warranty :10 years

Overview

How to charge a power tool battery?

Open the casing on the power tool battery charger carefully as we need it again. Remove all of the charging circuit and discard it, **DO NOT ATTEMPT TO USE IT WITHOUT THE CASING THIS MAY EQUAL DEATH!** Remove the rubber grommet from the power cable as we will use this as the laptop power cable exit.

Can a universal battery charger damage a power tool battery?

If your original battery charger kicked the bucket and you replaced it with a universal charger, you might be damaging your power tool batteries. The charger that your battery came with has the circuitry and sensors to know when the battery is too hot or overcharged.

How do you charge a lithium ion battery?

Use a charger specifically designed for NiCd or NiMH chemistry. Avoid overcharging; remove the battery once it's fully charged. For NiCd, fully discharge before recharging to reduce memory effect. For NiMH, avoid full discharge to prevent capacity loss. 2. Charging Li-ion Batteries Use a smart charger that stops charging once full.

How do you charge a NiCd battery?

Here's how to charge them correctly: 1. Charging NiCd and NiMH Batteries Use a charger specifically designed for NiCd or NiMH chemistry. Avoid overcharging; remove the battery once it's fully charged. For NiCd, fully discharge before recharging to reduce memory effect. For NiMH, avoid full discharge to prevent capacity loss.

How do you stop a battery from overcharging?

On the opposite end of the spectrum from overcharging, putting dead batteries away for long periods will also kill their capacity to hold a charge

over time. You can avoid this by swapping to a new battery before the first one dies, or simply charging dead batteries for 20 minutes before storing them. 3. Completely Draining Batteries.

Can you use a wrong battery in a tool?

Using the Wrong Battery in the Wrong Tool All rechargeable tool batteries have between 300 and 500 recharges before they're pretty much useless, so you have to be smart about how you use them.
