Overview

Does Austria have a market for energy storage technologies?

A study 1 carried out by the University of Applied Sciences Technikum Wien, AEE INTEC, BEST and ENFOS presents the market development of energy storage technologies in Austria for the first time.

How many photovoltaic battery storage systems are there in Austria?

Of these, approx. 94% were built with public funding and 6% without. The total inventory of photovoltaic battery storage systems in Austria therefore rose to 11,908 storage systems with a cumulative usable storage capacity of approx. 121 MWh.

How many tank water storage systems are there in Austria?

A total of 840 tank water storage systems in primary and secondary networks with a total storage volume of 191,150 m³ were surveyed in Austria. The five largest individual tank water storage systems have volumes of 50,000 m³ (Theiss), 34,500 m³ (Linz), 30,000 m³ (Salzburg), 20,000 m³ (Timelkam) and twice 5,500 m³ (Vienna).

How big is Austria's hydraulic storage power plant capacity?

In 2020, Austria had a hystorically grown inventory of hydraulic storage power plants with a gross maximum capacity of 8.8 GW and gross electricity generation of 14.7 TWh. This storage capacity has already played a central role in the past in optimising power plant deployment and grid regulation.

What is the future of energy storage?

Additionally, emerging technologies like thermal storage and flow batteries offer promising solutions for longer-duration storage. As renewable energy and storage technologies continue to evolve, their synergy will strengthen, enhancing the resilience, flexibility, and sustainability of the electricity system.

What are battery energy storage systems (Bess)?

Energy storage technologies are critical to this transition, enabling renewable energy sources to contribute a larger share of grid capacity. Battery Energy Storage Systems (BESS) are particularly versatile, with applications ranging from short-to-medium-term utility-scale grid support to commercial and industrial installations.
