

SolarInnovate Energy Solutions

Ukrainian Uninterruptible Power Supply Agent

Overview

Unstable power supply and power surges can interfere with electrical equipment and damage sensitive electronics. For such cases, a reliable system of uninterrupted guaranteed power supply is needed, which will protect electrical appliances and provide an alternative power supply.

Uninterruptible power supply systems provide protection against voltage fluctuations in distribution networks; the purpose of the device is to restore the output voltage without breaking the sinusoid. Switching the load to batteries and other.

When installing the appropriate equipment, it is possible to share the DGU and UPS and combine the functions of guaranteed and uninterrupted power supply in one SHE.

Our own high-tech production, cooperation with manufacturers of reliable and modern components, as well as extensive experience in projects of various levels of complexity allows us to implement the ideas of our clients at reasonable prices.
