

SolarInnovate Energy Solutions

Uninterruptible Power Supply of Brussels IPA

Overview

What is an uninterruptible power supply system (UPS)?

The Uninterruptible Power Supply system (UPS) is a necessity for companies, organisations, institutions or the government agencies requiring critical power protection for their daily operations.

Why do you need uninterruptible power supplies?

Our uninterruptible power supplies protect critical industries today and our electrical energy conversion systems are shaping a more secure and sustainable future. Our uninterruptible power solutions protect against mains power issues to ensure safe operation, protect people and reduce the risk of downtime and system failures.

Does eneria offer an uninterruptible power supply?

Thanks to our UPS offer, Eneria can guarantee an uninterruptible power supply for data center, in the field of healthcare, banking and insurance, telecommunications, industry or events. We offer integrated and customised systems that meet your electricity needs, thanks in particular to gensets equipped with Uninterruptible Power Supplies (UPS).

Why do you need a 3-phase uninterruptible power supply (UPS)?

With its compact design and easy installation, a UPS is an essential investment for uninterrupted productivity and peace of mind. A 3-phase uninterruptible power supply (UPS) plays a vital role in data centers, edge computing environments, or commercial or industrial applications where uptime and data integrity are critical.

How much power does LCL Brussels-North have?

In LCL Brussels-North, capacity has been boosted by a third to 1500kW per feed with the ability to expand to 2400kW per feed without difficulty." Even though the existing UPS systems could still serve requirements for some time,

LCL chose to make an additional investment and install a completely new system.

What is a no break KS® power supply?

The NO-BREAK KS® is a Dynamic Rotary Uninterruptible Power Supply (DRUPS) System with power ratings from 100 kVA up to 3000 kVA, operating at 400 Volts low voltage up to 20 kV medium voltage configurations, suited for both 50 and 60 Hertz.
