## Overview

---

Is Econergy launching a 50MW Bess project in Poland?

Delegates networking at the Energy Storage Summit Central and Eastern Europe (CEE) 2024 in Warsaw, Poland, last week, organised by our publisher Solar Media. Image: Solar Media. Econergy will soon start construction on a 50MW BESS project in Poland, the first of that scale to reach this stage in the market, the Israel-based IPP claimed.

Is Poland moving towards battery energy storage systems (Bess)?

As expected, Poland's latest capacity market auctions have highlighted a significant shift towards the battery energy storage systems (BESS) beside the fact that the de-rating factor has been significantly decreased.

Could Poland be the first to launch a grid-scale battery energy storage system?

Speaking to Energy-Storage.news at last week's Energy Storage Summit CEE 2024, its Poland country manager Przemek Zielinski said it could be the first to make it to the market with a grid-scale battery energy storage systems (BESS) there.

How many MW rated energy storage systems are there in Poland?

The capacity obligations for these projects ranged from 1.2 MW to 153 MW rated power, with an average capacity of around 30 MW. The decision to reduce the de-rating factor for energy storage systems in the last capacity market auction in Poland from 95 percent to 61 percent did not prove detrimental to the market.

How many MW of PV will Poland have?

"In Poland we will have 52MW of PV by the end of the year, and we are closing a deal and will initiate construction on around 50MW of storage in central Poland too, which is probably the first one of that size in the country.

What is Poland's energy storage subsidy?

Learn about Poland's €1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.
