Wellington Site Energy Battery Cabinet Policy

Overview

What is the Wellington Battery energy storage system?

The Wellington Battery Energy Storage System (BESS) will store excess renewable energy ready for use by homes and businesses during peak times. BESS projects play an important role in the future electricity system. Construction of the project will be undertaken by AMPYR's preferred construction contractors Fluence and RJE Global.

Could a lithium-ion battery energy storage system be developed at Wellington?

RWE Renewables Australia was exploring the possibility of developing a standalone, lithium-ion Battery Energy Storage System (BESS) at Wellington in New South Wales, on a site immediately adjacent to the Wellington Town substation.

How many megawatts will the Wellington TransGrid project have?

The project will have a capacity of approximately 500 megawatts (MW) and up to 1,000 megawatt-hour (MWh) and connect to the adjoining Wellington TransGrid substation either by way of 330 kilovolt (kV) overhead or underground transmission lines.

What is Clause 6.4 of the Wellington LEP?

Clause 6.4 of the Wellington LEP requires the consent authority to consider the likelihood of groundwater contamination from a development and potential impacts on groundwater dependent ecosystems prior to determining a development application. ! ! ! ! ! ! ! ! ! !
