What are the Brasilia Telecom base stations

Overview

How many 5G base stations are there in Brazil?

A total of 5,275 standalone 5G base stations have been activated in Brazil – double the minimum commitment. This represents 6% of the overall 93,159 base stations in the country. By 2025, 6,370 5G base stations must be installed in the state capitals. In total, the state capitals are home to nearly a quarter of the Brazilian population.

How many mobile operators are in Brazil?

Similarly, on the telecom carrier front, Brazil's four mobile operators, Vivo (Telefónica), Claro (América Móvil), TIM, and Oi are being reduced to three, with the exit of Oi following financial difficulties.

Why is Brazil a great telecom market?

Brazil is an exciting telecom market that offers significant demand, economies of scale, and comparatively smooth regulatory processes. We will see a lot more change in the coming years, as the biggest regional and global telecom operators and tower companies continue competing fiercely for a larger market share.

How many towers are there in Brazil?

The towerco has an initial inventory of 29,090 towers across 13 countries, with 39% of the company's total portfolio, or 11,233 sites, located in Brazil. This makes up 16% of the country's total 68,563 towers, making Sites the second largest towerco in Brazil after American Tower.

How many 5G towers will Brazil build in 2029?

Winity says it plans to build 5,000 towers by 2029 and establish itself as Brazil's first wholesale operator. In 2022, standalone (SA) 5G services using the 3.5GHz frequency band have been steadily rolling out in most of the nation's state capitals.

Is sites the second largest towerco in Brazil?

This makes up 16% of the country's total 68,563 towers, making Sites the second largest towerco in Brazil after American Tower. Sites is undoubtedly a major player in the Brazilian towerco landscape, however, the extent of its influence on the market is yet to be seen.
