What are the specifications of the photovoltaic panels of 580

Overview

What is a 580 watt photovoltaic panel?

Photovoltaic panels 580W - Longi Hi-MO 6 Explorer LR5-72HTD 550-580M-V03 UT Hi-MO 6 Explorer LR5-72HTD is a series of photovoltaic panels with a peak power range of 550-580 watts. They are part of the Hi-MO 6 Explorer series, which is known for its two aesthetic appearances: the Obsidian Black and the Stars design.

What are hpbc solar panels?

The panels are equipped with Hybrid Pasivated Back Contact (HPBC) solar cell technology and have a standard size of 182mm. They are available in 72-cell, 66-cell, 60-cell, and 54-cell configurations, making them adaptable to a wide range of photovoltaic systems.

What is a bifacial & monofacial photovoltaic panel?

Longi's monofacial and bifacial photovoltaic panels are suitable for a wide range of applications, including residential, commercial, and utility-scale installations. Their versatile design and easy-to-install mounting system make the installation process seamless, saving time and effort.
