# What is an outdoor wireless base station AP

## Overview

---

Outdoor access points (APs) are networking devices that provide wireless local area network (WLAN) connectivity in a form factor that protects against challenging environmental conditions—from outdoor public venues to oil rigs. Which Ubiquiti access point is best for outdoor use?

The Unifi Mesh access point is at the moment the most popular access point from Ubiquiti to use outdoors. It comes with two adjustable Omni antennas that can be angled 45 degrees to cover the area beneath the access point better. The antennas are removable, allowing you to replace them with spot-beam antennae for example.

Is TP-Link a good wireless base station?

TP-LINK's 5GHz 300Mbps \* Outdoor Wireless Base Station is specifically designed to provide an effective solution for outdoor wireless networking applications. With its centralized management platform and high degree of flexibility, it is the ideal choice for providing point-to-point, point-to-multipoint, and outdoor Wi-Fi coverage.

Do I need an outdoor WiFi access point?

Without an outdoor wifi access point, you have probably noticed that your wifi signal is too weak. Exterior walls and glass are great at blocking wifi signals, so to solve this you really have to place an access point outside. An outdoor ap can also be used to extend your wireless network into your garage or outbuilding that you might have.

What are outdoor access points?

Outdoor access points (APs) are wireless networking devices designed to provide Wi-Fi coverage in outdoor environments. They are frequently utilized in industrial and corporate environments where outdoor Wi-Fi access is necessary, as well as in public spaces like parks, stadiums, campuses, and locations for outdoor events.

Can you use an outdoor wifi AP outside?

Exterior walls and glass are great at blocking wifi signals, so to solve this you really have to place an access point outside. An outdoor ap can also be used to extend your wireless network into your garage or outbuilding that you might have. They can be used to create a wireless bridge between two buildings.

What is a long-range outdoor access point?

A long-range outdoor access point is a type of wireless access point that is especially designed to give long-distance Wi-Fi connectivity in outdoor locations. It is perfect for applications where users must access a wireless network from a distance, as in a big campus, park, industry, or remote places.
