We stock new and used battery cabinets in support of our energy storage packages, ups backup systems and rental UPS. Speak to a power expert to match up with your specific requirements. Read more. Have any questions?

.

Are battery cabinets safe?

As lithium-ion batteries have been known to ignite when being recharged, it's important to have a charging station that is free from faults and electrical malfunctions. Battery cabinets are constructed to have intrinsically safe electrical work that reduces the risks associated with recharging.

What makes a good UPS battery cabinet?

It is important to find a UPS Battery Cabinet that can easily be configured and adapted to match your UPS Systems; plus your UPS Battery Cabinet should be flexible enough so that it can either be upgraded or fit into any future new projects. Features should offer space-saving features that will fit into the most compact UPS designs.

What are battery charging cabinets?

Battery charging cabinets are a type of safety cabinet that's designed especially for lithium-ion batteries. Over the recent years, as the prevalence of lithium-ion batteries has grown in workplaces, battery cabinets have become more popular due to the many risk control measures that they provide.
