Will the Yamoussoukro power plant be equipped with new energy storage

WORKING PRINCIPLE

Overview

What are the shortcomings of China's new power system?

Luo Zuoxian, head of intelligence and research at the Sinopec Economics and Development Research Institute, said shortcomings of a new power system lie in the energy storage, which is also a worldwide issue, and improving the new energy storage capacity will further improve the country's new power system.

Will China expand its energy storage capacity by 2025?

China aims to further develop its new energy storage capacity, which is expected to advance from the initial stage of commercialization to large-scale development by 2025, with an installed capacity of more than 30 million kilowatts, regulators said.

Will China achieve full market-oriented development of new energy storage by 2030?

The country has vowed to realize the full market-oriented development of new energy storage by 2030, as part of efforts to boost renewable power consumption while ensuring stable operation of the electric grid system, a statement released by the National Development and Reform Commission and the National Energy Administration said.

Will new energy storage be more expensive in 2025?

The NDRC said new energy storage that uses electrochemical means is expected to see further technological advances, with its system cost to be further lowered by more than 30 percent in 2025 compared to the level at the end of 2020.

When will new energy storage development be introduced?

The commission said earlier it will introduce a plan for new energy storage development for 2021-25 and beyond, while local energy authorities should also make plans for the scale and project layout of new energy storage

systems in their regions.

What is new energy storage?

New energy storage refers to electricity storage processes that use electrochemical, compressed air, flywheel and supercapacitor systems but not pumped hydro, which uses water stored behind dams to generate electricity when needed.

Will the Yamoussoukro power plant be equipped with new energy st
